

Hirenexus offers an unique service to the Private Equity world. We specialize in post-acquisition recruiting, providing both quality and volume across a broad range of disciplines, on a contingent basis.

We Know Private Equity

We understand that in the private equity world, speed is paramount. Once a new company has been acquired and the major retained searches have been filled, there are many key positions that still need to be addressed. These are important roles within the organization at the Director/VP level and below, that can be incredibly diverse across the organizational chart. They need to be filled quickly, and with qualified and experienced candidates.

The Hirenexus Difference

While there are many traditional contingent firms that specialize in single-area searches, we provide comprehensive recruiting solutions to our private equity clients. Our team is able to fill positions across a wide spectrum of specializations.

Focused on Growth

Hirenexus has worked with various Private Equity firms to support their talent acquisition goals. We have helped \$25 million dollar platform investments transition into \$300 million organizations. Additionally, our team has successfully helped portfolio companies as large as a billion dollars with their strategic hires.
